State of Maryland
Department of Health & Mental Hygiene
201 West Preston Street
Baltimore, MD 21201

BALTIMORE
MD

Dear Mr. Noren:

On April 19, 1976, a program for decontamination of Kepone formulating equipment was provided to the Task Force. This program which was subsequently approved by the Task Force has been followed at the Baltimore Agricultural Plant. An interim report on the decontamination was provided to your office on August 10, 1976. I am forwarding with this letter the final report dated January 27, 1977. All actions taken at the site have been in line with the control criteria established in the original program and have been reviewed by Dr. O'Neil M. Banks, Division of Labor and Industry. I believe that with the submission of this document, decontamination of the Kepone area of the plant is complete and the record can be closed.

Should there be any questions, please feel free to contact the undersigned.

Very truly yours,

W. M. Reiter
Associate Director
Pollution Control
